

COMP30850 Assignment: Grading Rubric

Assignment is worth 40% of overall module grade

Task	Component	Mark
Task 1	Static Network Construction - Data loading and parsing - Construction of an appropriate static network	15
Task 2	Static Network Characterisation - Characterisation of the static network - Centrality analysis of the static network - Identify any stations with significant positive net flow and significant negative net flow	30
Task 3	Static Network Visualisation - Creation and export of the required subgraph - Visualisations of the subgraph using Gephi	20
Task 4	Dynamic Network Analysis - Creation of time window networks - Analysis of the time window networks using global measures - Identify stations where capacity should be increased	25
General	- AI Use Statement - Python code quality and notebook structure - Use of Markdown cells for interpretation and explanation	10
	Total	100
